

FEIL post pallets are multi-stackable load carriers used for cost-saving modular block storage tailored to requirements. Torsion-resistant base units and plug-in pipes of different lengths ensure the optimal usage of space and height. FEIL post pallets can be effortlessly adapted to changed requirements at any time.

The post pallets are assembled on the basis of a simple connector system without dowelled joints, ensuring optimal stability at all times. All components are zinc-plated for weather-resistance and high durability. FEIL post pallets are particularly suitable for Euro and industrial pallets and can be stacked up to a total height of 6 metres in warehouses and up to 4 metres in open-air storage areas.

The advantages at a glance:

- Multi-stackable load carriers
- Optimal use of space and height
- Mobile storage system
- High level of stability
- Adaptable for changing requirements
- Connector system for trouble-free construction
- No dowelling required

FEIL post pallet.

The cost-effective block storage with a system.

Sewer pipe rack

FEIL sewer pipe racks. Easy storage and picking.

Using this FEIL special pallet system, a wide range of pipes (KG, SML, HT, PE, etc.) can be stored with minimum space requirements in multiple pallets stacked on top of each other. Once the complete packages have been simply lifted into the empty pallet using a forklift truck and the transport packaging straps have been opened, the individual pipes can be easily removed lengthwise at any time.

Technical details

Dimensions	1300 mm internal measurement x 2400 mm for pipe lengths of 3 - 5 m
	1300 mm internal measurement x 3500 mm for a pipe length of 6 m
	1300 mm internal measurement x 1000 mm for a pipe length of 2 m
Usable height	with a grid floor 1300 mm, variable upon request

Many advantages at a glance:

- No ground anchoring required
- Mobile installation possible, no assembly costs
- Low space requirement thanks to the stackability of opened packing units
- Loading using a forklift possible, no manual reloading)
- All pipe lengths can be stored in only than two or three different pallet sizes
- Vertical support tubes for space-saving stacking when empty
- Low transport costs for empty pallets
- Easy stacking thanks to self-centring circular bases
- All-purpose (can also be used for wooden palisades etc.)
