EMPTIES**

ROLLDOLLYS AND CHASSIS

- welded version
- load capacity of 200 – 2000 kg
- for indoor and outdoor use
- optional ESD version
- surface: hot-dipped, galvanized or powder coated
- material: stainless steel or aluminium
- special designs possible on request

STACKING FRAME

- mesh 50x50 or 100x100 mm
- welded version
- net load: 800 kg
- extra load: 1600 kg
- surface: galvanized or powder coated
- special designs possible on request

BIG-BOXES AND PLASTIC PALLETS

- double-walled insulated bulk container, made from a single mould with inner insulation made from foamed polyethylene or foamed polyurethane
- long-lasting UV protection
- craneable
- lightweight and robust
- food-safe
- RFID identification
- easy drainage through drainage holes
- individual colour and logo design
- load capacity up to 1000 kg

PICKING CART AND SIDE TROLLEY

- large selection of shelves
- Euro-box dimensions 400x600 mm
- load capacity up to 400 kg

BARREL HANDLING

- welded version
- load capacity up to 200 kg
- for gas bottles 10 – 50 ltr.
- for barrels 60 – 200 ltr.
- surface: powder coated

LOAD SECURING

- safe transport of goods
- visual cover possible
- sustainable methods for securing the load
- cost-efficient solutions

INNOVATIVE DRIVES

- electric drives, stand-up tractor and pulling tractor for roll containers and tugger trains
- up to 1000 kg load capacity

WHEELS & CASTORS

- more than 2000 different wheels and castors on stock, which can be shipped within 1-3 days
- load capacities up to 1000 kg
- for different applications

SPECIAL APPLICATIONS

- in-house design and development
- design and production in accordance with safety standard DIN EN 1757-2022, DIN EN 12674-1
- more than 20,000 m² storage space for just-in-time deliveries
